

permanent chain HOW TO...

Embark on your welding journey with forever chains and charms!
A step by step guide on how to fulfill your permanent chain story.

1.

PICK YOUR CHAIN

Select your perfect chain, from the classic Paper Clip style to our elegant Twisted Heart chains!

2.

PICK YOUR CHARM

Elevate your wrist stack or single bracelet with a charm that reflects your personal style. Choose from our collection of station and drop charms. Drop charms, which require jump rings, can be added anywhere along the chain for a customizable look. Station charms, on the other hand, are designed to be soldered securely at the end of the chain, creating a polished and seamless finish.

3.

MEASURE & CUT

Use a tape measure to determine the desired length, then cut the chain to your preferred size. It's best to leave a little room on the wrist for a comfortable fit.

4.

SOLDER YOUR CHARMS

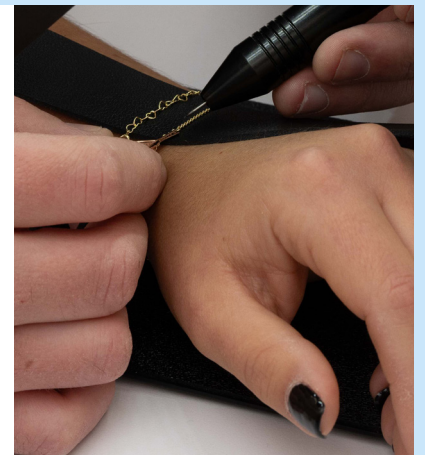

Before assembling your bracelet, be sure to solder the charms onto the chain first, before attaching it to the wrist.

5.

GET ZAPPING!

Once your chains are in place, secure them around your wrist and solder the ends together for a flawless finish.

6.

STACK & STYLE

Stack your chains and charms for endless styling possibilities. The lightweight design and durable construction of these bracelets allow you to wear them comfortably every day, while easily mixing and matching for a unique look.
